

TECHNICAL ASSISTANCE FOR **BUSINESS** **SUSTAINABILITY**

WHY SUSTAINABILITY?

Sustainability has become an important component of any business plan.

Cutting waste, increasing efficiency, and saving money are good for business.

Operating in the "green" can have significant benefits on your bottom line, employee retention, and reputation.

HOW CAN WE HELP?

We can help your business accomplish its sustainability goals, find available resources, navigate compliance issues, and connect to the services you need.

Many resources are available to assist your business with waste prevention and recycling, energy efficiency and green power, transportation options, water conservation and efficiency, and pollution prevention.

Please contact the Washington County agencies and organizations listed on the back for help.

WASTE PREVENTION & RECYCLING

Recycle at Work provides recommendations, resources and ongoing assistance to improve your recycling and waste prevention programs.

City of Beaverton: (503) 526.2460
